RE: Application for Front-end Developer Internship position.

Dear sir/madam,

I am an entry level Software Developer. This email is to express my interest in your posting on LinkedIn, for an Information technology intern. I am interested in the front-end part of web development.

The UI part of web design is my favorite part of the development process. In all of my projects, I strive to create visually appealing interfaces. I enjoy working on challenging projects that enable me to get out of my comfort zone.

I have been able to create both functional and appealing sites using HTML, CSS and React. My key achievements being

- I worked on the front-end part of a collaborative ecommerce website that aims to connect customers with vendors and producers of fruits and vegetables.
- I used React.js to create a themed movie website that consumes a third party API. Users are able to search through characters' names and get their information.
- I used JavaScript and CSS animations to create a visually appealing sneaker advertisement card.
- I have created a mobile app UI design which sells different products from cherry fruit.

I have attached a copy of my CV containing my portfolio with all of my projects. Feel free to reach me via my phone number 254729457716 or at babrakoskei@gmail.com. I look forward to hearing from you.

Best,
Babra Koskei.
